Fuel Efficiency	In 2015, America's railroads moved a ton of freight an average of 473 miles on one gallon of fuel. That's like going from Charleston, SC to Charleston, WV. On average, railroads are four times more fuel efficient than trucks. Moving freight by rail instead of truck reduces greenhouse gas emissions by 75 percent.	
Cutting Highway Gridlock	One train can carry as much freight as several hundred trucks. It would have taken approximately 3.8 million additional trucks to handle the 67.6 million tons of freight that originated in, terminated in, or moved through South Carolina by rail in 2014.
